Lam Vu Minh Nhat

Full-Stack Developer

✉ lvminhnhat@gmail.com | 💼 LinkedIn | 🐱 GitHub
📱 +84 964 977 320 | 📍 District 4, Ho Chi Minh City

🎓 EDUCATION

ITMO University - Saint Petersburg, Russia
Major: Computer Science Applications
Graduation Year: 2025

💼 WORK EXPERIENCE

Bloommedia, Ho Chi Minh City

Full-Stack Developer & AI Automation
April 2025 – Present

- Develop and maintain full-stack applications (FastAPI/Django + React) and Windows desktop apps.
- Deploy workflow automation with N8n and integrate AI models.
- Fine-tune AI to optimize internal processes and automate tasks.
- Collaborate with other departments to optimize work processes.

THD Cybersecurity - Ho Chi Minh City

Backend Intern (Python - Golang) | *May 2024 - September 2024*

- Built RESTful API with authentication and authorization.
- Optimized API performance with big data through caching and appropriate data structures.
- Processed and integrated data from Datadog with Splunk.
- Developed microservices with Golang and Docker.

⚒ TECHNICAL SKILLS

Backend Development

- **Languages:** Python, Golang, Node.js, TypeScript.

- **Frameworks:** FastAPI, Django, Fiber (Go), Express.js.
- **Database:** MongoDB, PostgreSQL, Redis, SQLite.
- **Tools:** Docker, Postman, Swagger/OpenAPI.

Frontend Development

- **Core:** HTML5, CSS3, JavaScript (ES6+).

- **Frameworks:** React.js, Next.JS.
- **Styling:** Tailwind CSS.
- **Design Tools:** Figma (UI/UX design).
- **Build Tools:** Vite, Webpack.

Programming Skills

- **C/C++:** Competitive programming (Rating 1658 Codeforces):
  - 2nd place in Provincial Informatics Competition, Lam Dong.
  - Participated in National High School Student Competition 2020-2021.

- **Python:** Automation (ADB, Selenium), Web scraping.
- **IoT:** Arduino, ESP8266.

Soft Skills

- **Languages:** English (reading comprehension, basic communication), Russian (reading comprehension, basic communication).

- **AI Tools:** Proficient in using AI tools and optimizing workflows with AI.
- **Others:** Teamwork, Problem analysis and solving, Presentation, MC.

🚀 PERSONAL PROJECTS

ROK Helper - API Service | *2025*

[GitHub](#)

- **Description:** Backend API service for ROK Helper application, managing titles in Rise of Kingdoms game.
- **Tech Stack:** Golang, Fiber, MongoDB, Swagger.
- **Highlights:** Performance optimization with goroutines, automatic API documentation generation.

ROK Scandata - Data Scanning Tool | *2025*

[GitHub](#)

- **Description:** Player data scanning tool via ADB and OCR, commercialized product.
- **Tech Stack:** Python, tkinter, ADB, OCR.
- **Highlights:** Multi-instance support, complete UI, recently open-sourced.

Discord Auction Bot | *August 2023*

GitHub

- **Description:** Bot automating game reward auctions on Discord.
- **Tech Stack:** Python, Google Sheets API, Render deployment.
- **Highlights:** Uptime monitoring with UptimeRobot.

Financy - Expense Manager | *June 2022*

GitHub

- **Description:** Desktop application for personal expense management.
- **Tech Stack:** Python, Kivy, SQLite, Figma (UI/UX).

☑ CAREER OBJECTIVES

Deepen front-end knowledge, strengthen backend skills, and develop comprehensively into a senior-level developer.
